

The Power of PREMIER

Premier Energy Services, Inc. is an established engineering and construction management company, specializing in the design and construction of steam and power systems. Founded in 1995, we have provided our expertise to many customers, assisting them in solving their utility needs, especially those requiring a "fast-track" solution. We perform projects on an "Engineer, Procure, and Construct" (EPC) basis and strive to meet three critical objectives:

- **Jobsite safety**
- **Cost control and budget management**
- **Project schedule**

Our experience covers a wide range of system designs from field erected and packaged water tube boilers to industrial fire tube boilers, including the utilization of wood, coal, biomass, gaseous and liquid fuels.

Premier Energy Services, Inc. provides the necessities required for today's business environment such as insurance, strong banking partners, and vendor support. It is our mandate to provide individualized customer service and build a lasting, professional relationship with our clients and vendors.

Premier Energy Services, Inc. has the experience to solve your steam and power requirements, whether it is the optimization of an existing plant, new plant design and construction, fast track projects or trouble free start-ups.

Owner Benefits
